In 2006, Baszucki and Cassel launched Roblox Studio. It was, in Bronstein's own phrasing, an "immersive creation engine", blending gaming, creation, and social networking. Roblox might have the veneer of a video game, but it's perhaps more accurate to describe it as a set of tools its users can wield to build their own video games (or "experiences" as the company sometimes refer to them), to be hosted on the Roblox platform. These creation tools are designed to be less daunting to the entry-level developer than professional game engines, and fully customisable frameworks exist across numerous genres. These include maze-runners, first-person shooters, tycoon simulators, and free-form "roleplay" genre, where developers create worlds – schools, cities, historical eras, sci-fi dystopias, etc – for users to project their own stories onto, informed by their interactions with the setting and other users.

There are also lots of game-specific scams out there especially in the bigger games such as Adopt Me. All of the major games do their best to combat scammers but the key thing to learn here is that if something seems too good to be true then it probably is and should be avoided. Make sure you educate your kids about scammers and they should remain safe and happy.
